Essential **Laws of UX** Every Designer Should Know

1

Hick's Law

(More options = More time to decide)

Simplify choices to make decisions easier for users.

How's your mood? ^

Incredible!

Amazing

Great

Good

Fine

Ok

Not bad

I've been better

Not so good

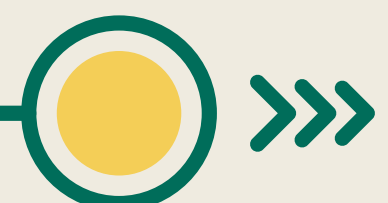

How's your mood?

☒ Great

☐ Good

☐ Bad

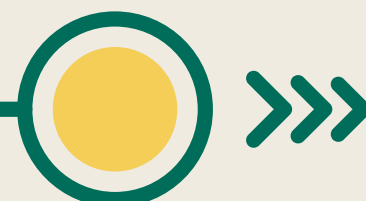

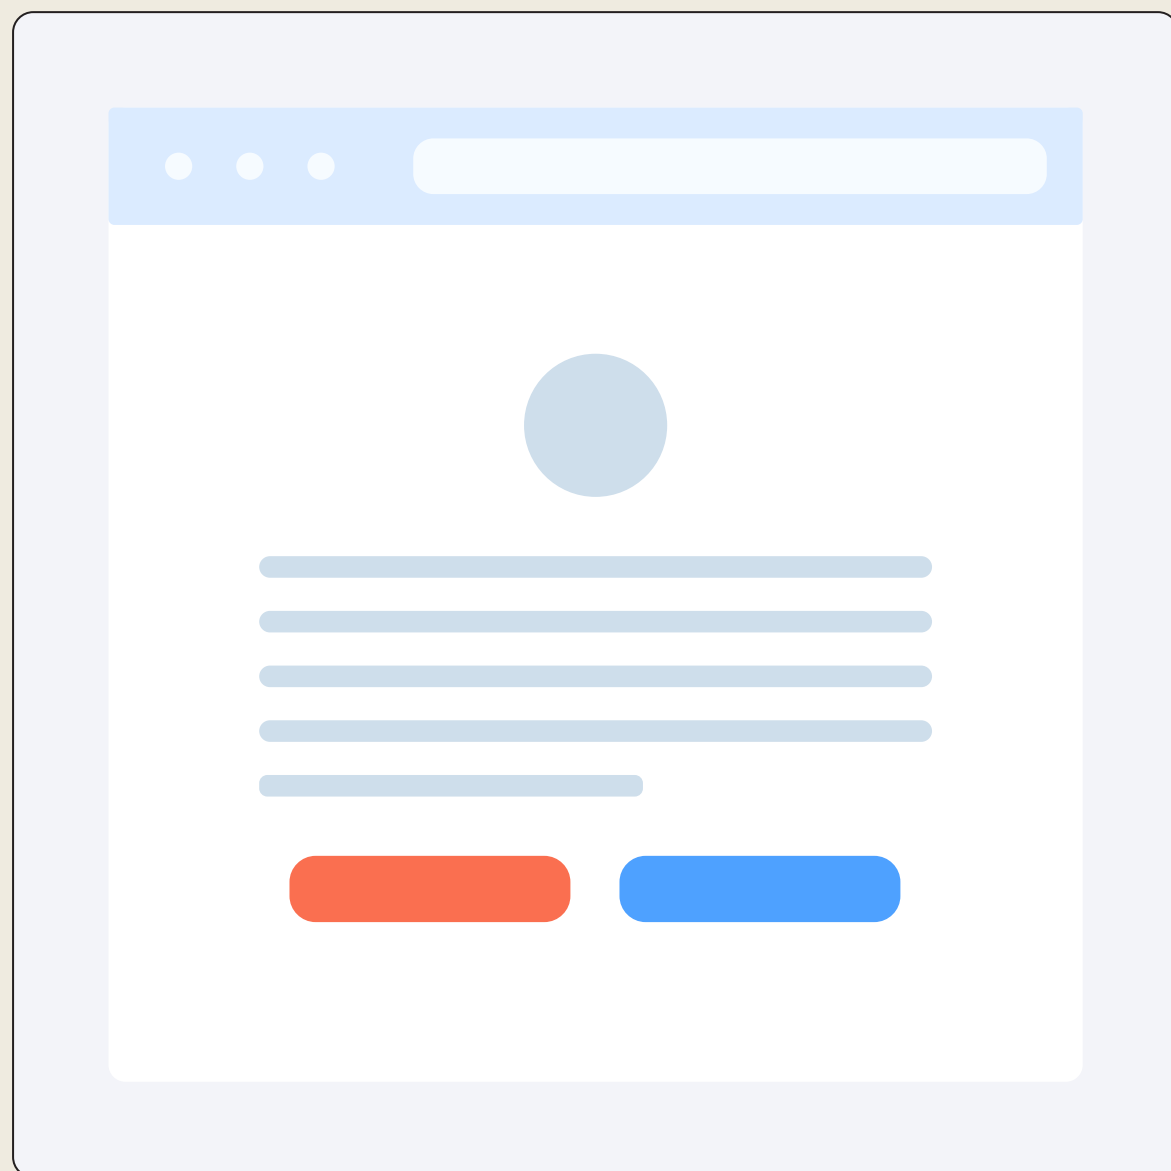

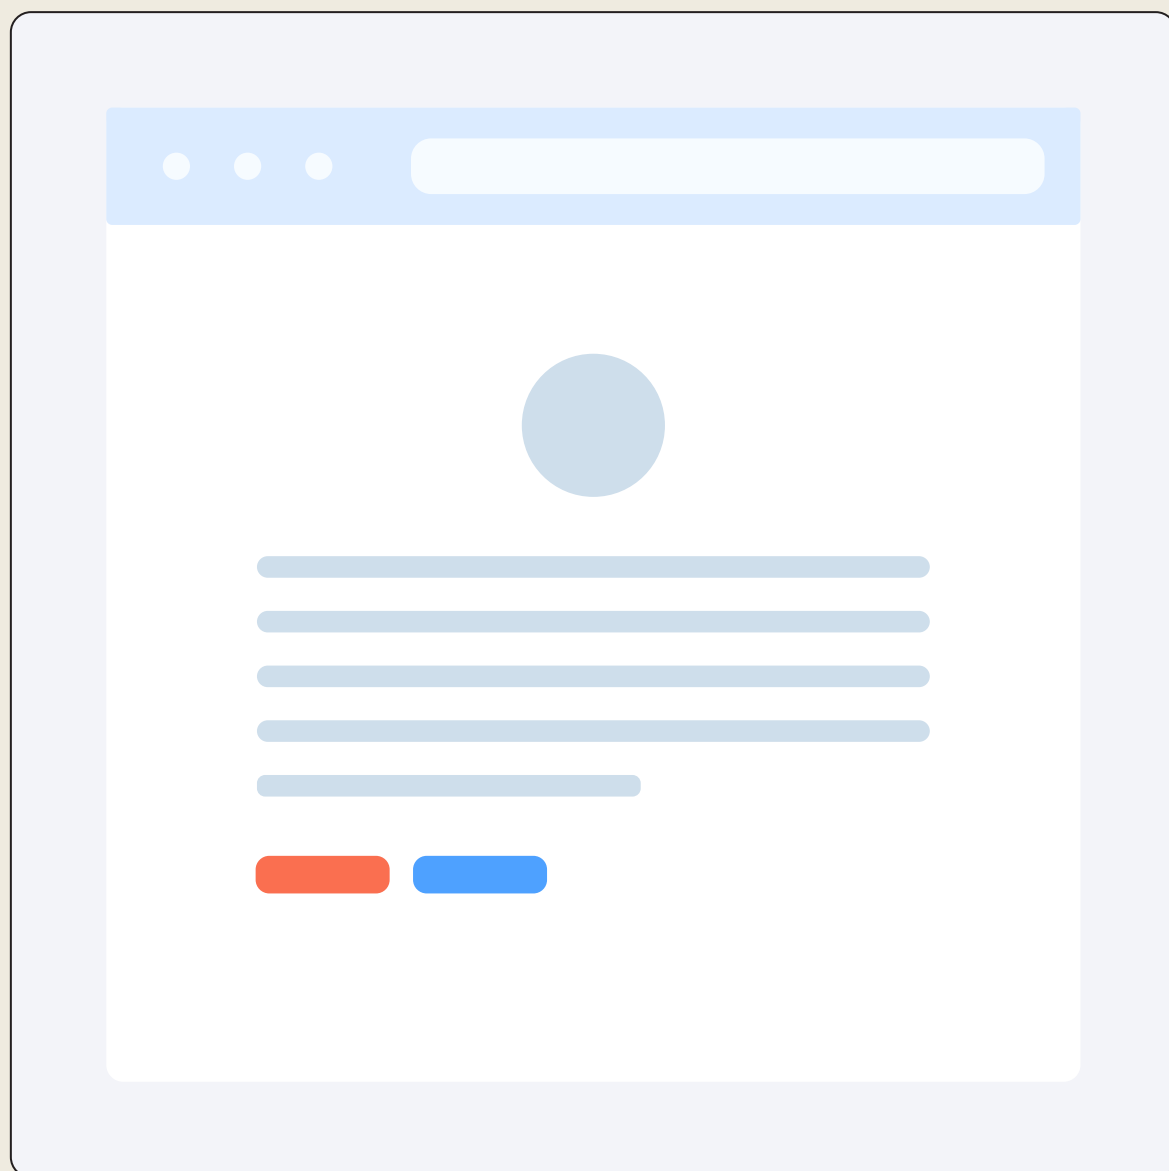

2

Fitts's Law

(Make it easy to click)

Larger and closer buttons
make interactions faster.

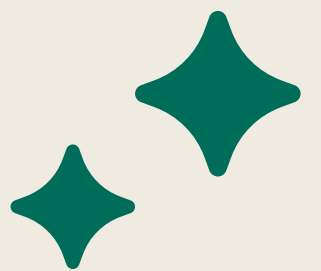

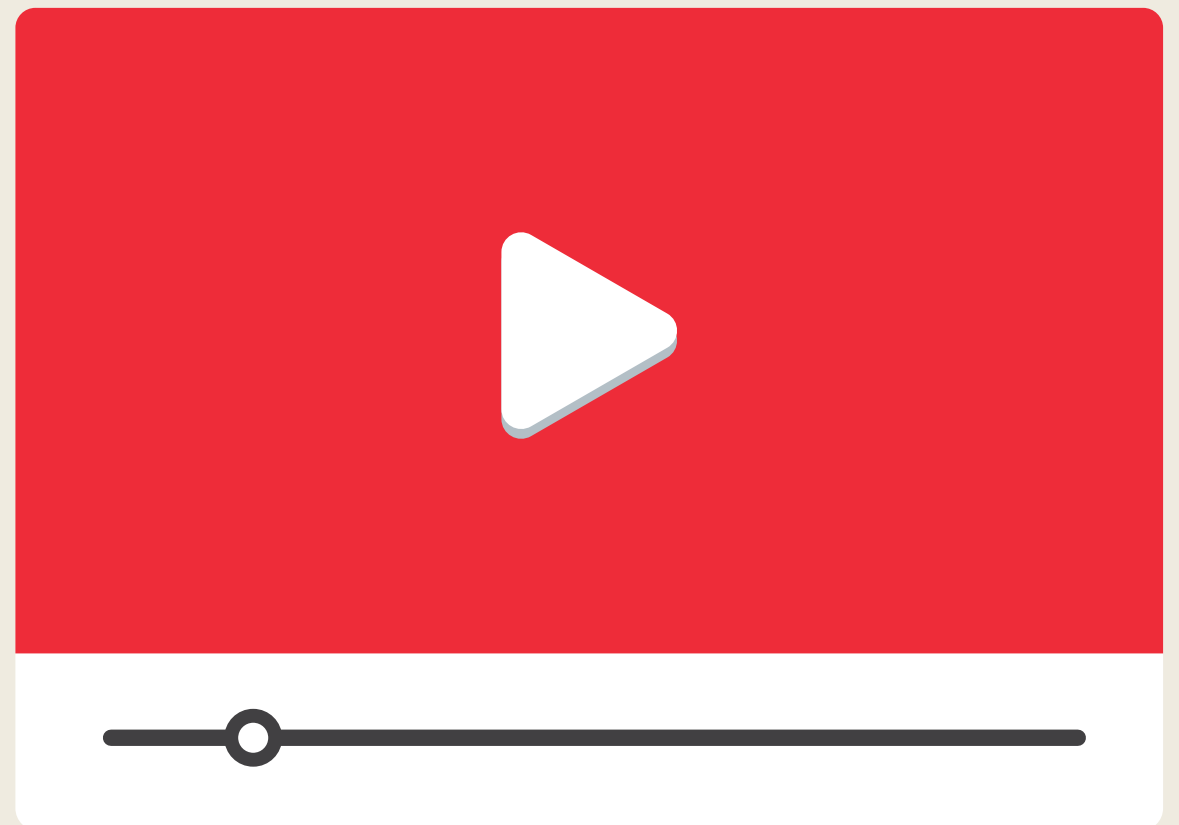

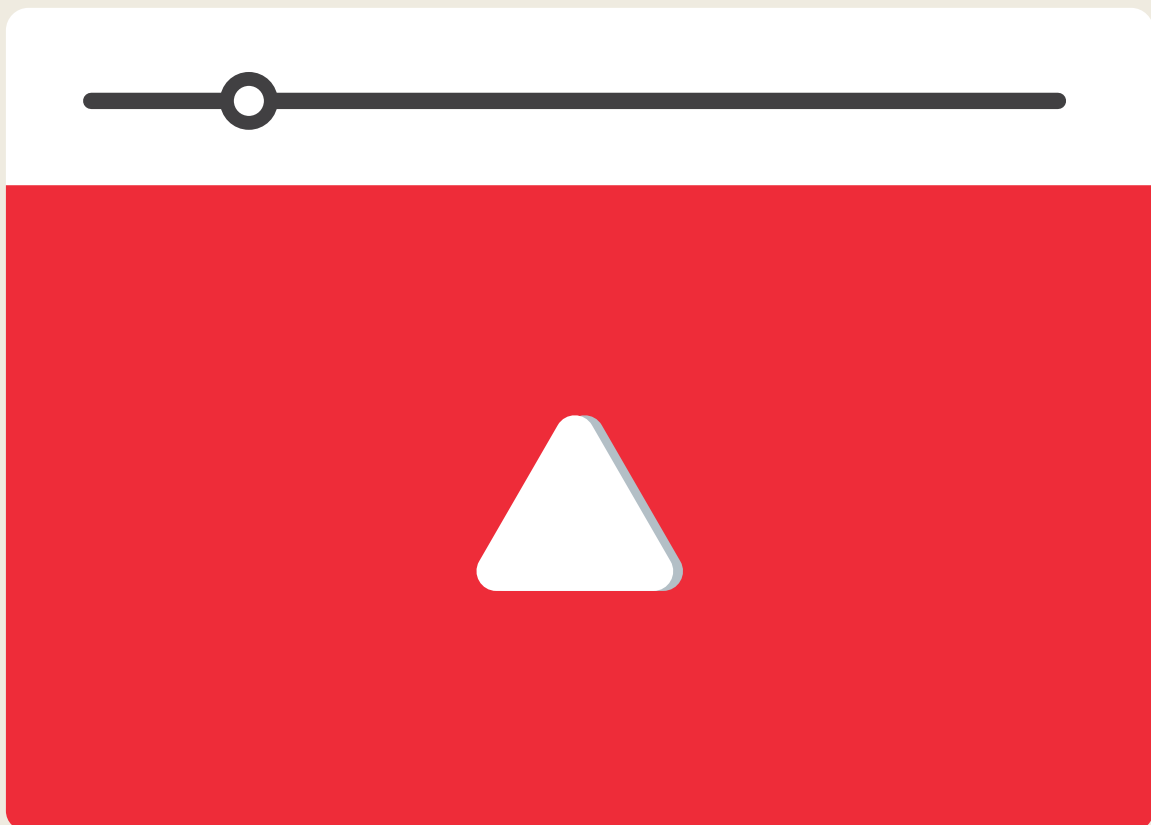

3

Jakob's Law

(Users prefer familiar patterns)

Follow established design conventions to improve usability.

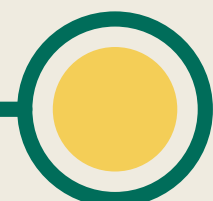

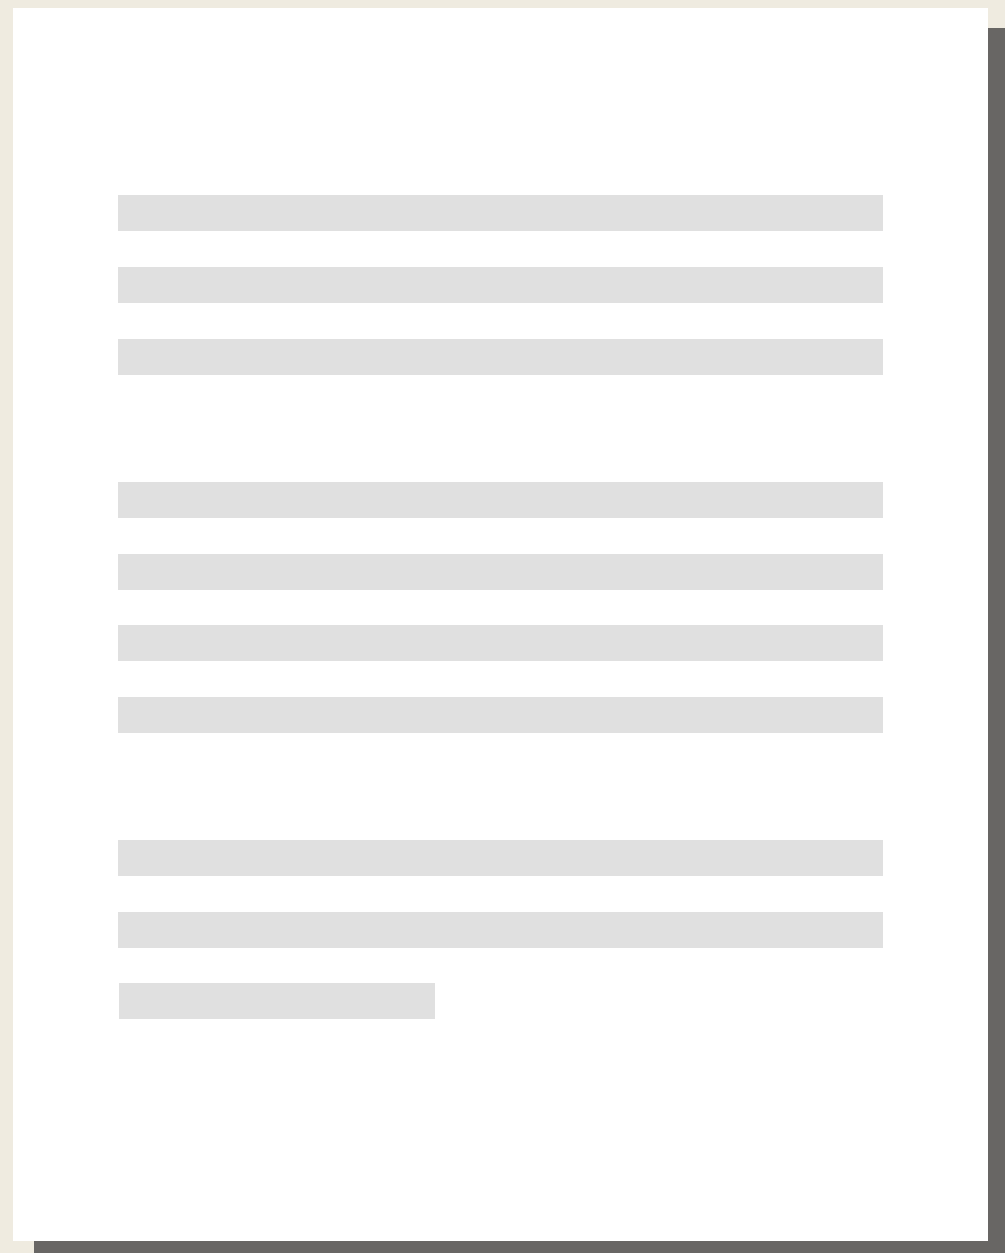

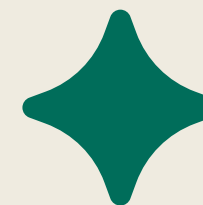

4

Miller's Law

(Users prefer familiar patterns)

Follow established design conventions to improve usability.

5

Tesler's Law

(Some complexity is unavoidable)

Simplify where possible, but guide users through necessary complexity.

000

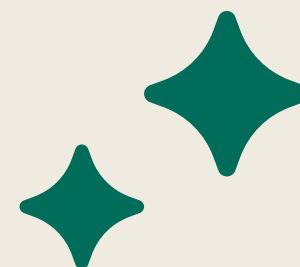

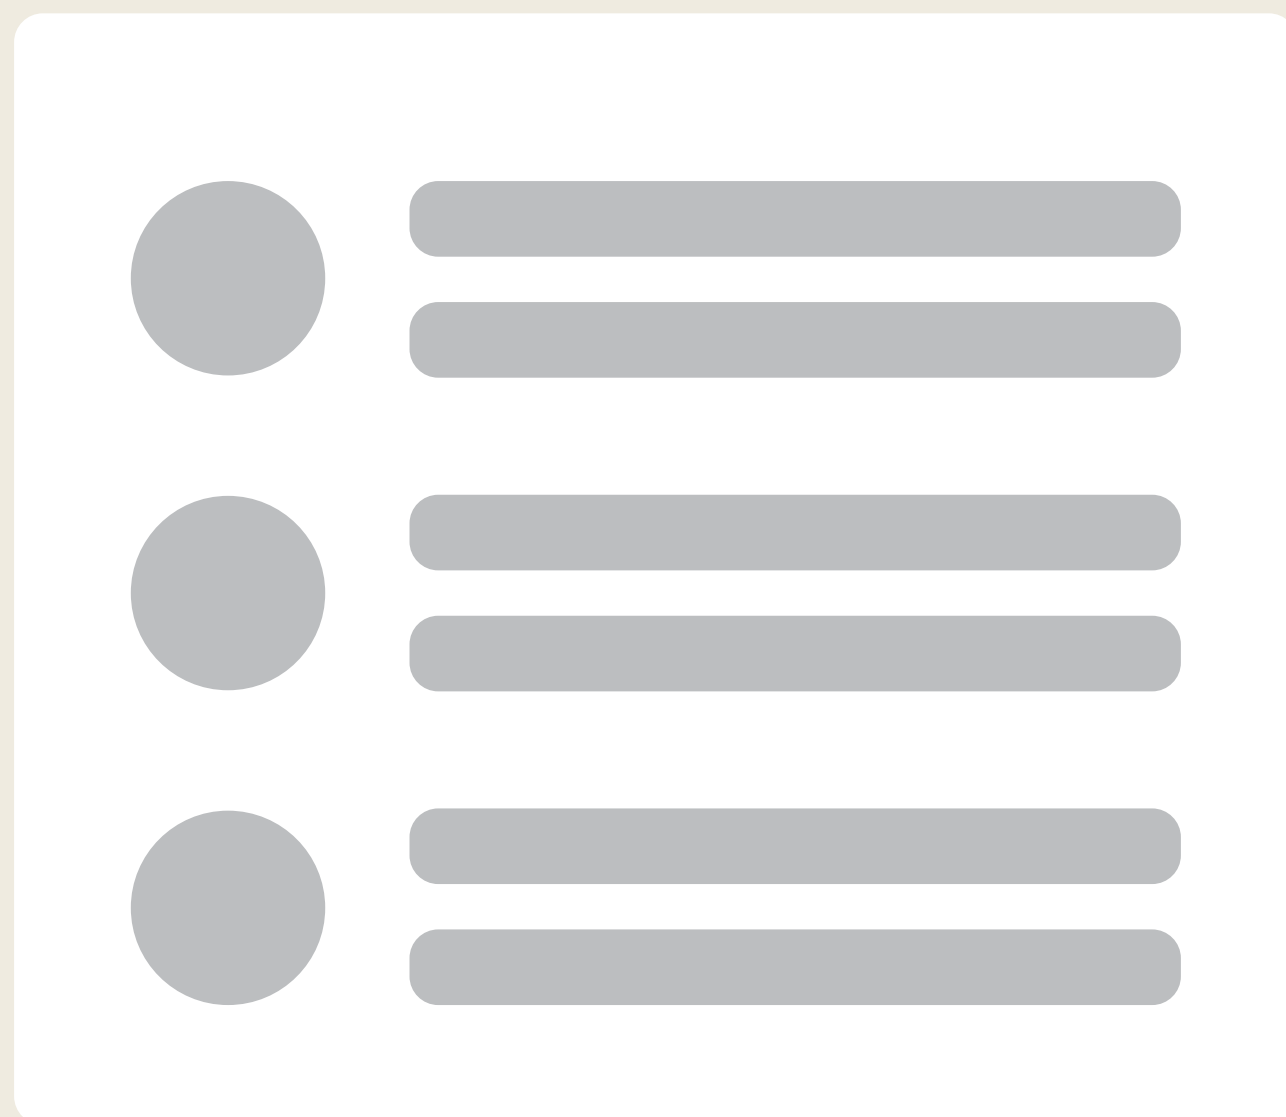

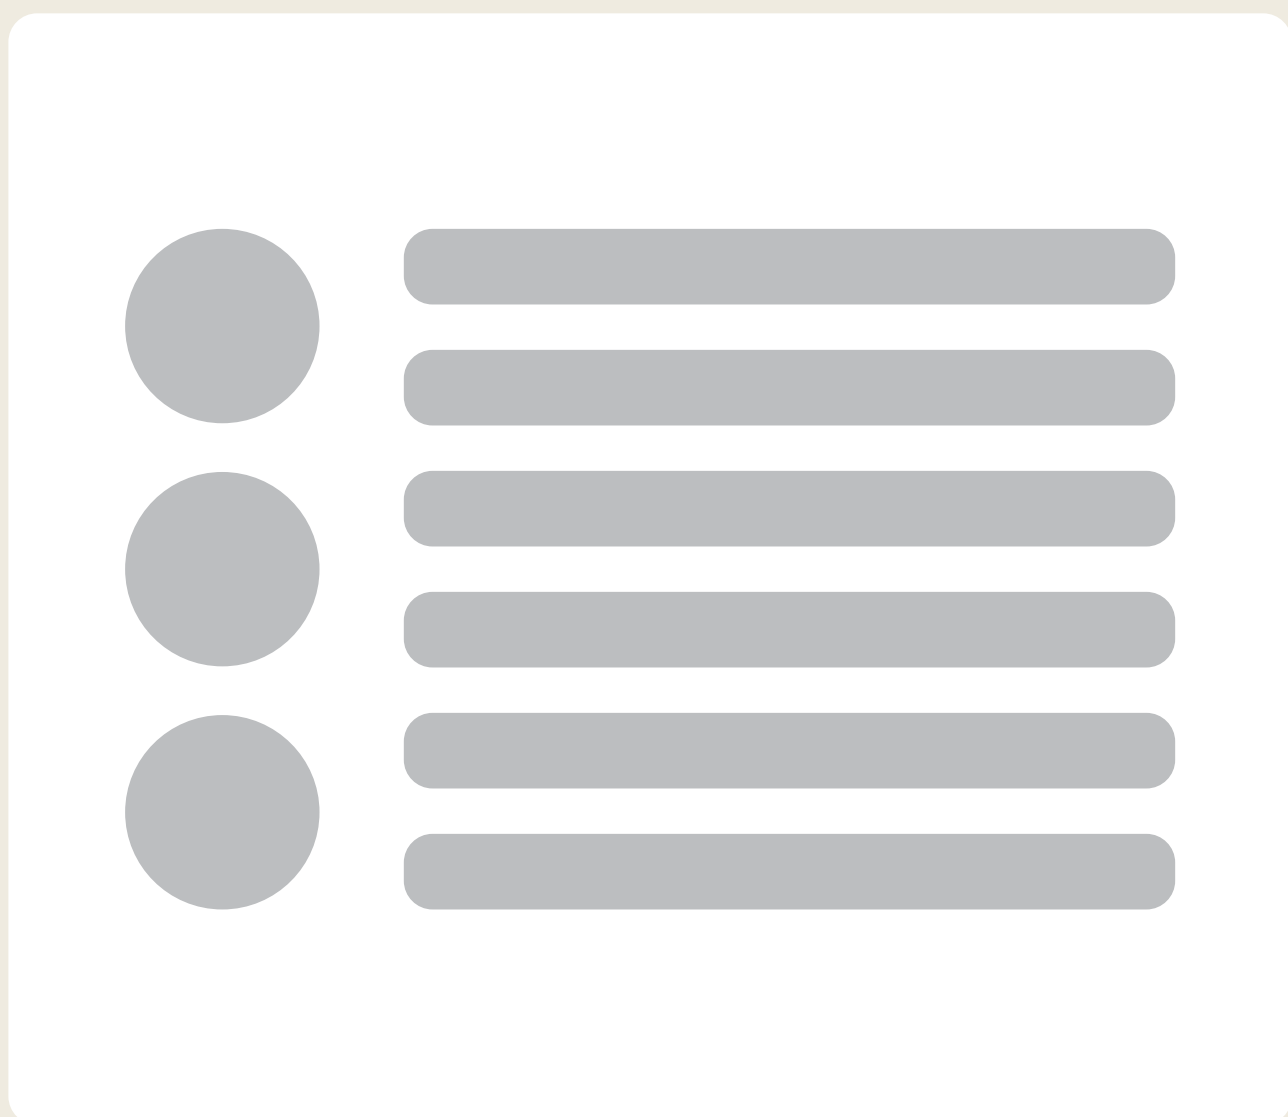

6

Law of Proximity

(Group related items together)

Users perceive elements that are close together as related.

7

Peak-End Rule

(Users remember the peak and the end)

Focus on delivering positive peak moments and endings.
