I think you should read the HUGE description about me somewhere in this page or scroll down a lot to see my repos or nothing if you're using the API...

Overview Repositories 26 Projects 1 Packages

kha\by786 / README.md

Send feedback

Hi 🖐️, I'm
Khaleel Gibran 🍩

I am from Mars!

It's me, Khaleel Gibran. You've probably never heard of me. And I've never thought of writing a README for myself. Usually READMEs are written for applications and softwares, but here I am writing a README about me. READ me. And you cannot star this repo, even if you click the `Star` button.

Use GIF/Illustrations

adding gif or illustration in your readme file gives you a personality and makes your profile visually appealing

I'm a java programmer, a frontend developer, and a tech enthusiast! 🧠

- 🛠 I'm currently working on SheGazette
- 🌱 I'm currently a Generation Google Scholar
- 🤝 I'm looking to collaborate on projects
- 😓 I'm looking for help with JavaScript
- 💬 Ask me about blogs
- 😊 Pronouns: She/Her
- ⚡ Fun fact: I have broken humor

Connect with me: 🤝

Badges: To honor your skills

Things I code with

Projects I am working on

RedwoodJS

Contributing to RedwoodJS. Redwood is an opinionated, full-stack, serverless web application framework that will allow you to build and deploy JAMstack applications with ease. Imagine a React frontend, statically delivered by CDN, that talks via GraphQL to your backend running on AWS Lambdas around the world, all deployable with just a git push—that's Redwood.
